Hello,

My name is Ethan Barton. I'm a reporter with the Daily Caller News Foundation. I understand that you were the On Scene Coordinator present when the blowout occurred. I also understand that the orders left by OSC Steven Way were to not excavate the adit.

The adit was excavated, regardless. I would like to know if Way verbally changed his orders, if you were acting on someone else's orders, if you feel responsible for the spill, or if there's anything else I should know.

You can also call me at 410-829-1738.

Thank you,

Ethan
